

HABERDASHERY

PASSAN, haberdashery production company, has been established in **1991**.

The company was founded by one person and has remained a family company until today.

From the beginning we specialized in the production of **bullion fringes**. In response to market demand we regularly launch new narrow goods into the market.

We are now recognized in the industry as one of the leading **producers of trimmings**. Continuous development of our company increases the production capacity of our facility. Today we can manufacture 25 000 000 meters of narrow goods a year. Modern machinery (e. g. Comez) , qualified staff and best raw materials make good base for high quality of our products.

In order to ensure the completeness of our offer and attractive prices, in addition to production activities, we **import haberdashery**.

We offer: tiebacks, tassels, pompom braids, tassel fringes, beaded trim, decorative braids and gimps, metallized braids, decorative cords, decorative strings, elastic tapes, floral ribbons, acrylic beads, flocked beads, pearl beads, string curtains, cotton laces.

We are decent partner with position on Polish domestic market and abroad.

We invite to cooperation!
